Ontologies and LLMs: *Democratising Scientific Data*

Joe Mullen, PhD

24th April 2024

Roll out and adoption of GenAI brings changes to user expectations when interfacing with technology

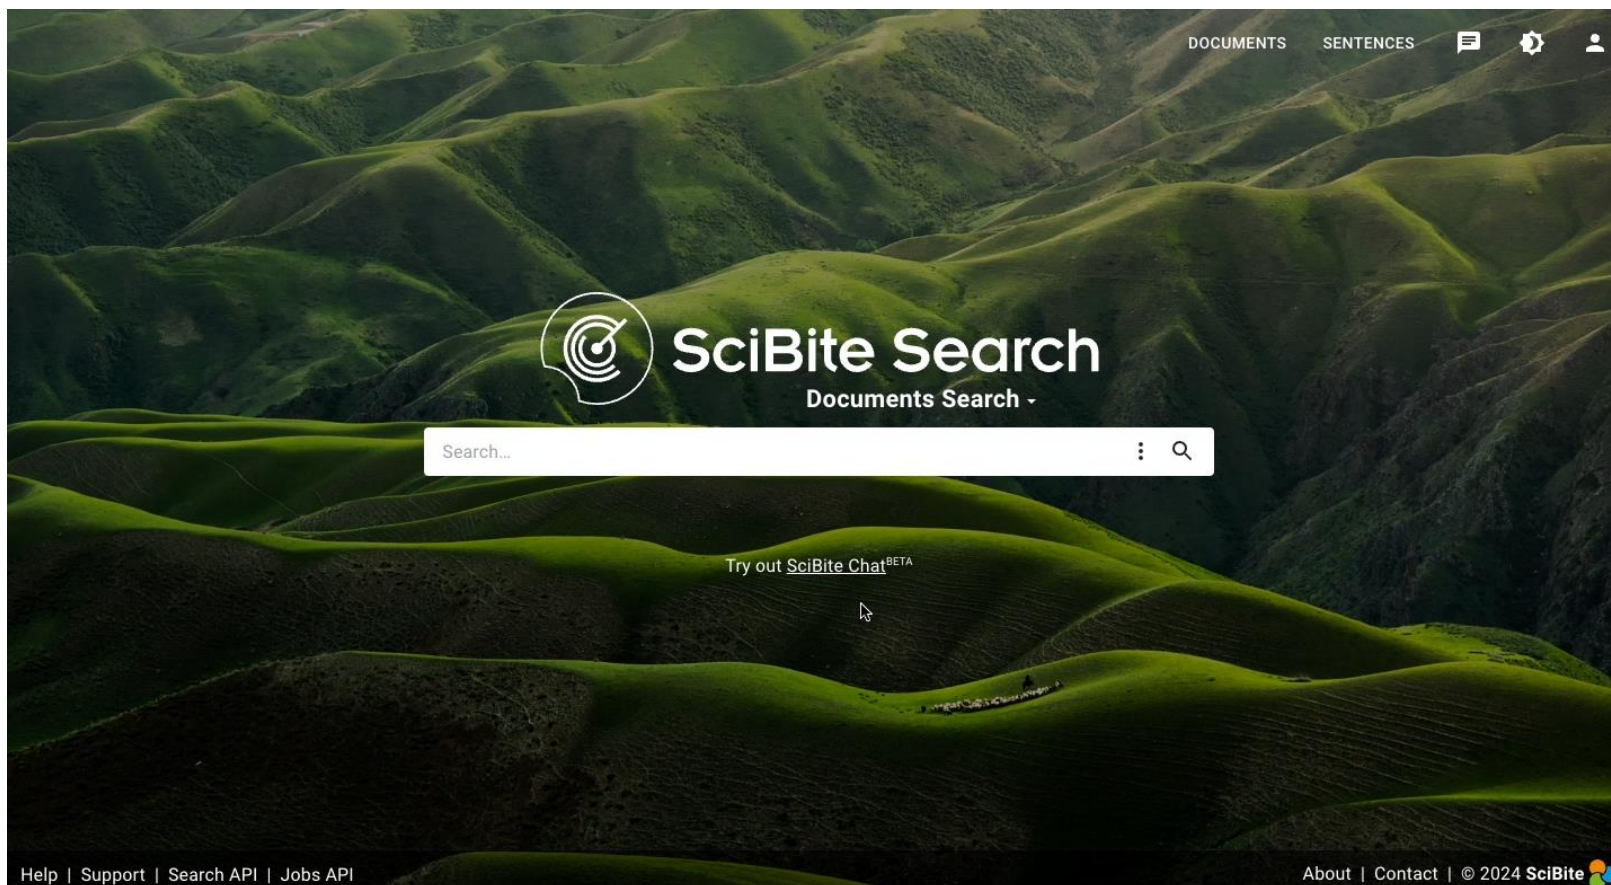

How can GenAI enable insight within life sciences?

SciBite Chat

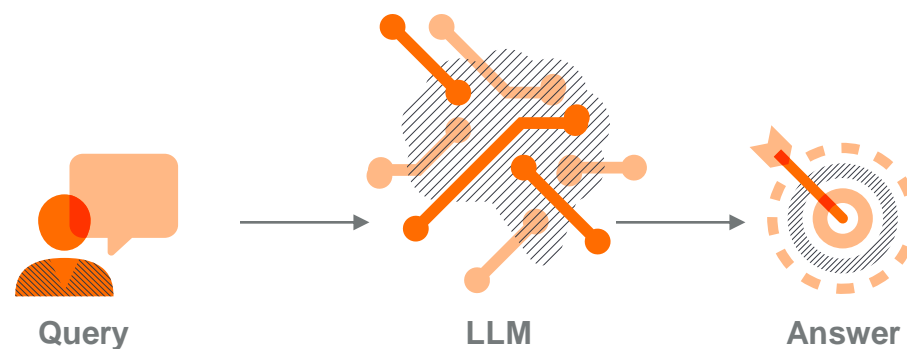

Launched
April '24!

Democratising data; speeding up insight

But how did we get here?

Did we just ask an LLM direct?

Duchenne muscular dystrophy—what causes the increased membrane permeability in skeletal muscle
David G Allen, Nicholas P Whitehead

Duchenne muscular dystrophy is a severe muscle wasting disease caused by a mutation in the gene for dystrophin—a cytoskeletal protein connecting the contractile machinery to a group of proteins in the cell membrane. At the end stage of the disease there is profound muscle weakness and atrophy. However,
